OBSTETRICS:
Marcie Miller, CPC
Billing Manager
South Metro OB/GYN

AGENDA:
- Global Billing
- Split Billing
- Complications
- Accounts Receivable
ICD 10 Codes for gestation weeks:

Z3A._

For example…
Z3A.16
Z3A.32

However…
Z3A.00
Z3A.01

G 4 P 1 AB 2

What is that?

Descriptions of Pregnancies:

- Primigravida is a woman's first pregnancy
- Gravida is a woman who has been pregnant before.
- Young primagravida is a woman that will be less than 16 years old at the time of delivery.
- Elderly primagravida is a woman who will be 35 years or older at the time of delivery.
- Parity is a woman who has given birth to a fetus weighing 500 grams dead or alive.
ICD 10 Codes:

- Supervision of young primigravida unspecified trimester O09.629
- Supervision of elderly primigravida unspecified trimester O09.529
- Pregnancy codes start with O00 to O9A
- Encounter for normal screen of mother Z36

If a patient transfers service:

- For 1-3 visits E & M codes would be used depending of services. Most likely 99215 for the first visit, the 99213 for the 2nd & 3rd visit.
- 59425 would be used for billing 4-6 visits
- 59426 would be used for 7 or more visits
59400 is routine OB care with vaginal delivery including ante partum care and postpartum care 6 weeks following delivery.

59510 is routine OB care with a cesarean delivery including ante partum care to include 2 week follow up and 6 week follow up.

Normal vaginal OB care with split billing due to insurance change may look like this.
59425 - 4-6 visit billed to Aetna

We use a dummy code for reporting our OB visits (F59421)

59426 - 7 or more visit billed to Cigna with normal vaginal delivery to include postpartum care 59410
ULTRASOUNDS IN PREGNANCY:

76801 through 76828

- 8 week US 76817 pregnant uterus transvaginal used for confirmation of pregnancy
- 1st trimester US 76813 patient may also have blood work done for further testing
- 20 week US 76811 real time image for documentation fetal and maternal evaluation plus detailed fetal anatomic examination transabdominal approach.
- A quick look ultrasound is billed as 76815

COMPLICATIONS IN PREGNANCY

- Diabetes
- Hypertension
- Severe hyperemesis
- Preterm labor
- Multiple gestation
- Pregnancy with abortive outcome to include elective
- Hypertension in pregnancy preexisting O10 billed out by trimester
- Gestational pregnancy hypertension O12 billed out by compilation

COMPLICATIONS CONTINUED...

- Pre-eclampsia O14
- Eclampsia O15
- Unspecified maternal hypertension
- Excessive vomiting in pregnancy and hyperemesis O21 through O21.9
- Preterm labor O60.10 6th digit must be used per trimester and fetus
- Multiple gestations must include number of gestations, number of amniotic sacs and number of placentae 7th character is required to identify the fetus for which the complication affects.
MULTIPLE GESTATIONS:

- MONO-MONO
- DI-DI
- QUADS
- TRIPLETS
- TWINS
- MONO-DI
PREVIOUS CESAREAN SECTION:

59610-Routine obstetric care including antepartum care, vaginal delivery (with or without episiotomy, and/or forceps) and postpartum care after previous cesarean delivery

59618-Routine obstetric care including antepartum care, cesarean delivery, and postpartum care, following attempted vaginal delivery after previous cesarean delivery

ABORTIVE OUTCOMES:

- Missed Abortion: early fetal death with retention of dead fetus or retained products of conception not followed by spontaneous or induced abortion or delivery
- Incomplete Abortion: not all the products of conception are expelled at the time of encounter
- Complete Abortion: all the products of conception are expelled at the time of encounter
- ICD 10: MAB O02.1

ECTOPIC PREGNANCY

- Ectopic pregnancy can occur when an embryo implants outside of the uterine cavity, most common is in the fallopian tube which left untreated and results in a ruptured fallopian tube.
- ICD-10 Codes: O00.1 Z3a.08 at 8 weeks
59120 surgical treatment of ectopic pregnancy requiring salpingectomy or oopherectomy abdominal or vaginal

OTHER PREGNANCY RELATED CONDITIONS

- Hydatidiform Mole  O01.1 classical
- O01.1 Incomplete
- O01.9 Unspecified
- Blighted ovum  O02.0  use additional code to identify any associated complications
- CPT Codes 59812 through 59857 would be used

BILLING:

1. Patient presents with pregnancy symptoms positive UCG

May bill 99213.25
78611 Ultrasound done to confirm placement
2. Patient comes in to be seen for sinus infection outside of routine OB visits.

99213 O99.89 Z3A.28 weeks

Don’t forget the 24-modifier since this would not be considered as part of the Global OB package.

3. Would a post-partum complication like post partum depression, breast infections, pelvis infections, postpartum hemorrhaging be included with the global charge?

No. You would code with the appropriate E&M code and attach the 24-modifier for unrelated E & M during a postoperative period.

**Billing Deliveries:**

59400 Routine OB care to include antepartum and postpartum care

O14.93 Unspecified pre eclampsia 3rd trimester
Z3A.39
Z37.0
59510 C-S Routine OB care to include antepartum and postpartum care

O34.211 Maternal care for low O-S following previous C-S

58611 Ligation of fallopian tubes when done at time of C-S delivery

Z30.2 Encounter for sterilization

QUESTIONS???
GYNECOLOGY:

Dee Ehrensberger, CPC, COBGC
Senior Coding and Billing Specialist
Pinnacle Medical Partners
South Denver OB/GYN

PREVENTATIVE EXAM:

Typical Well Woman Exam includes:
- General preventative examine – age and gender appropriate
- Gynecological issues including breast and pelvic exam
- Pap Smear

99385 or 99395 New/Established Patient 19-39
99386 or 99396 New/Established Patient 40-64
99387 or 99397 New/Established Patient 65+

Surgical Procedures:

- Endometrial Ablation-58563
- Endometrial Biopsy-58100

- Endometrial ablation is a procedure that destroys (ablates) the uterine lining, or endometrium. This procedure is used to treat abnormal uterine bleeding. Sometimes a lighted viewing instrument (hysteroscope) is used to see inside the uterus.
- The endometrium heals by scarring, which usually reduces or prevents uterine bleeding.
Endometrial biopsy: A catheter is inserted into the uterus through the vagina to remove cells from the uterine lining for examination.

**The NovaSure Procedure**
- Your doctor slightly opens your cervix (the opening to the uterus), inserts a similar wand, and advances a triangular mesh device into the uterus.
- The mesh expands to the size and shape of your cervix.
- Precisely measured radio frequency energy is delivered through the wand for about 50 seconds.
- The mesh device is pulled back into the wand, and both are removed from the uterus.

**HYSTERECTOMIES**
- A hysterectomy removes the uterus and may also remove the cervix (total) and ovaries, tubes, lymph nodes and upper vagina (radical).
Total Abdominal Hysterectomy (TAH)

58150- Total abdominal hysterectomy (corpus and cervix) with or without removal of tubes with or without removal of ovaries.

Vaginal Hysterectomy

58260 Vaginal Hysterectomy for uterus 250g or less
58262 w/ removal of tubes and ovaries
58290 Vaginal hysterectomy for uterus > 250 g
58291 w/ removal of tubes and ovaries

Laparoscopic Assisted Supracervical Hysterectomy (LSH)

58541-LSH for uterus 250 g or less
58542- w/ removal of tubes and ovaries
58543-LSH for uterus > 250 g
58544- w/ removal of tubes and ovaries
### Laparoscopic Assisted Vaginal Hysterectomy (LAVH)

- 58550-LAVH for uterus 250 g or less
- 58552- w/ removal of tubes and ovaries
- 58553-LAVH for uterus >250g or less
- 58554- w/ removal of tubes and ovaries

### Laparoscopic Total Hysterectomy (TLH)

- 58570-TLH for uterus 250 g or less
- 58571- w/ removal of tubes and/or ovaries
- 58572-TLH for uterus > 250 g
- 58573- w/ removal of tubes and/or ovaries

(DaVinci) Robotic Assist - S2900

### Fulguration or excisions of lesion of ovary, pelvic viscera, or peritoneal surface by any method

CPT 58662

YouTube:
### IUD's

- 58300-Insertion
- 58301-Removal
- J7298-Mirena
- J7297-Liletta
- J7301-Skyla
- J7300-Paragard

Kyleena-J3490 or S4989

- Z30.014 Encounter for initial prescription of intrauterine contraceptive device (excludes insertion)
- Z30.430 Encounter for insertion of intrauterine contraceptive device
- Z30.432 Encounter for removal of intrauterine contraceptive device (excludes insertion)
- Z30.433 Encounter for removal and reinsertion of intrauterine contraceptive device

### NEXPLANON:

- 11981- Insertion, non-biodegradable drug delivery implant
- 11982- Removal, non-biodegradable drug delivery implant
- 11983- Removal and Reinsertion, non-biodegradable drug delivery implant
- J7307- Nexplanon

### ICD10:

- Z30.017 Encounter for initial prescription of implantable subdermal contraceptive
- Z30.46 Encounter for surveillance of implantable subdermal contraceptive
COLPOSCOPY:
- 57420: Colposcopy of entire vagina with cervix, if present
- 57421: with biopsy of vagina/cervix
- 57422: Colposcopy of cervix including upper/adjacent vagina
- 57444: with biopsy of the cervix and endocervical curettage
- 57455: with biopsy of cervix
- 5746: with endocervical curettage

CERVICAL PROCEDURES:
- The cervix and transformation zone

Transformation Zone
Loop Electrosurgical Excision Procedure (LEEP)

CPT: 57522/57460

CONE BIOPSY

CPT: 57520
Conization of cervix, with or without fulguration, with or without dilation and curettage, with or without repair; cold knife or laser

SLING PROCEDURES:

CPT: 57288-Transvaginal (TVT)
51990-Laparoscopic urethral suspension for stress incontinence

CPT: 57287-Revision of Sling Procedure
**MISCELLANEOUS PROCEDURES:**

Pessary:
- A4561-Pessary
- 57160-Pessary Insertion

Incision and Drainage:
- 56420-Bartholin Gland
- 10060-Abscess

Diaphragm Fitting: 57170

 Destruction of Lesion:
- 57061-Vagina-simple
- 56501-Vulva-simple

Excision of Lesion:
- 11420-skin-hand, feet, scalp, neck, genitalia <0.5 cm
- 56605-Vulvar or perineum biopsy 1st lesion
- 56606-Additional lesions

**MODIFIERS**

- 24-Unrelated E/M by same physician during postoperative period.

- 25-Separate, significant E/M service on same day as another service or procedure.

- 57-Decision for Surgery

- 22-Increased Procedural Services

- 50-Bilateral Procedures

- 51-Multiple Procedures

- 52-Reduction of service (electively cancel)

- 53-Discontinued procedure (have to stop)

- 59-Distinct procedural service

- 78-Unplanned return to operating room by same physician during postoperative period

- 79-Unrelated procedure by same physician during postoperative period
